NOTICE TO CORRESPONDENTS.

Communications on editorial matters should be addressed to "The Editor," and those on business "The Manager," and not to individuals by name

wishes to work from that point till he meets Mr. Cain's party.

The other two branch lines, Sections G and H, have not yet been commenced, owing to the flooded state of the country. There is no immediate necessity for pushing on these branches as the periods allowed for their construction are three and four years respectively.

Mr. Galway has gone up the river to visit the different surveying parties and will be absent for some time. It was planned some time ago to have the sub-section to Muang Kao, Mr. Clarke of Messrs. Windsor Clarke & Co., is the Agent in Bangkok for the Contractors.

From the foregoing statement it will be seen that there are about 70 miles of the survey completed, the plans of which are ready, and will form the basis of the working plans, sections, dimensions, elevations and estimates which will be carefully prepared under the superintendence of Mr. Ridder. Every one who knows anything about surveying can attest the difficulties which the engineers have had to contend with from the high grass and jungle and the natural features of the country will admit that this is a very good result of only about two months' work. If the surveys are proceeded with at the same rate during the dry season of the year, the work will undoubtedly be finished within the stipulated period.—*Siamese Gazette.*

#### THE RISKS OF AN INDIAN CAREER.

A curious proof of the little practical value which, in their plan of life, men attach to the probable longevity or otherwise of the professions they may select is the eagerness with which they are inclined to look at the long lists of names and the ages at which the examinations held for admittance into the Civil Service, the Army, the Medical, Public Works, and Forest Services, to form an idea of the famous competition which is going on for posts in the Indian service. Yet something more has to be added to this. There is a gradually increasing influx of young men into the country who are unable to enter through the above-mentioned classes and are sent out with letters of recommendation to India, and who, when of decent size, is an Indian appointment.

There is a large proportion—several of them, I might say, on the part of those who have been successful than himself. The reason that a couple of these officers, unprofitable though they are, have obtained a lowered, in other words, the likelihood of his premature death indefinitely enhanced.
